

Spotlight Reporting and Forecasting for your business

Spotlight Reporting is a powerful cloud-based management reporting tool transforming your financial and non-financial data into visual performance reports that can be presented as PDF or shared online, providing the insight for making better decisions and improved accountability.

Spotlight Forecasting allows a quick and easy creation of budgets, three-way forecasts and scenarios, enabling businesses to look forward with certainty and strategise for the future.

If you are a business owner needing better insight or a finance manager reporting to the Board or management team, Spotlight gives you a clearer picture of your business.

What are the key features?

Easy importing of data

Quick real-time data import from Xero, QuickBooks Online, Excel and non-financial software with full Google Analytics integration.

Reporting

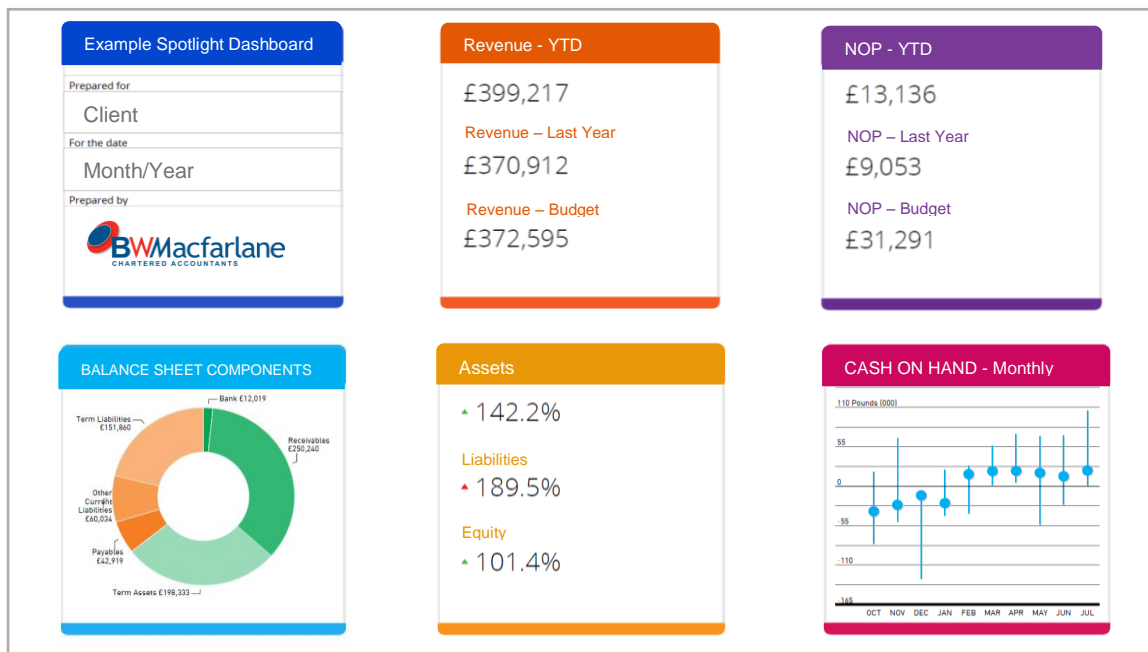

Comprehensive management reports with many customisation options and an executive summary for highlights and recommendations.

Dashboards

Fully customisable dashboards with financial and non-financial KPI reporting.

Forecasting

'All-in-one' forecasting tool bringing together into one solution - a budget creator, three-way forecasting and scenario builder to unlock the power of forecasting cashflow, profit and loss, balance sheet

Speak to us today about how cloud accounting software can transform your business.

Our cloud bookkeeping, accounting, reporting and forecasting services are tailored to your individual needs. We can provide a complete finance function with bookkeeping and preparation of management accounts, complemented by our 'Virtual FD' services, or simply help you as needed with advice, set-up and training.
